Threatcop DMARC

(Domain-based Message Authentication, Reporting & Conformance)

An Email Authentication, Domain Monitoring, and Anti-spoofing Solution

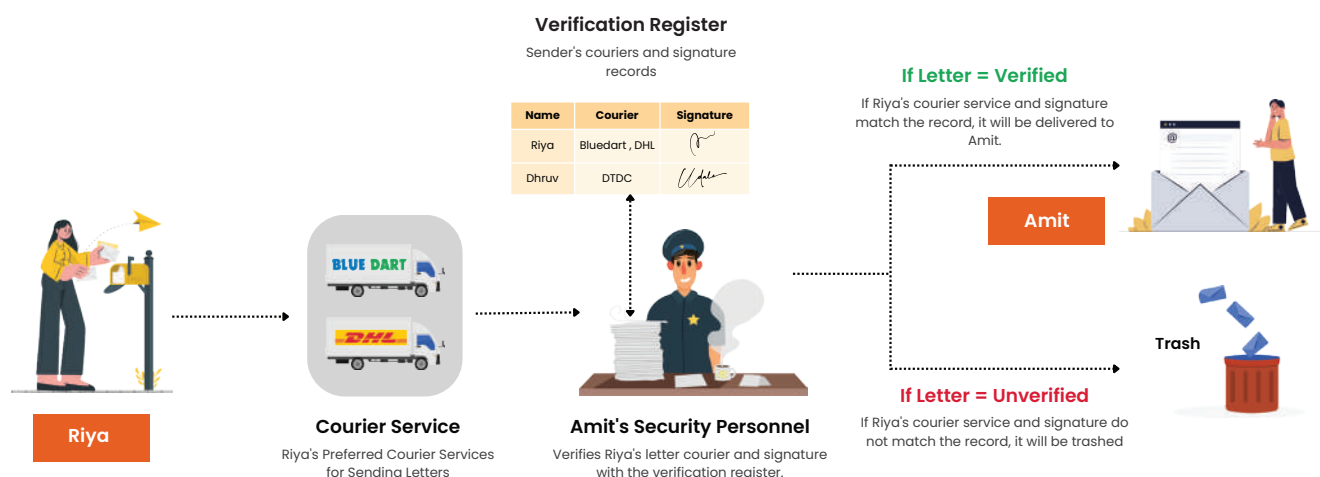

TDMARC is a solution engineered to protect organization's outbound emails, preventing Business Email Compromise (BEC) attacks such as Impersonation, False invoices, and CEO fraud. That's why we advocate for People Security Management (PSM) that uses the AAPE (Assess, Aware, Protect, and Empower) framework, where TDMARC functions as the "Protect" element to prevent email-based threats.

- *Smart Controls - Enhanced SPF/DMARC/BIMI*
- *Scheduled Reports for Compliance, Sender, Geolocation, Receiver, Forwarder, and Executive Insights*
- *BIMI Generator & Verification Tool*
- *Blacklist IP Monitoring*
- *Advanced TDMARC Utilities*
- *Lookalike Domains Status Detection*
- *Vendor DMARC Checklist*
- *Domain Threat Classification*

Threatcop DMARC Features

Base Features

- DNS timeline (DNS record monitoring)
- Complete outbound email channel monitoring
- Subdomain discovery
- Smart SPF
- SPF Flattening
- Smart DMARC
- DMARC record Setup
- DMARC compliance status for each sources
- Smart BIMl
- Email authentication policy setup
- Email Assessment

Threat Detection

- Look alike domain status
- Auto Detection of SPF IP and DNS Update
- Blacklist IP status
- Vendor DMARC Check list
- Schedule reports (email alert) weekly or daily

Reportings

- Report by Forwarders
- Report by Receiver
- Report by Sender
- Report by Geo-location
- Report by Compliance

Administration

- Unlimited users, domains and domain groups
- IAM (Identity Access Management)
- SSO Login
- Two-factor authentication
- Technical SPOC

Smart Features

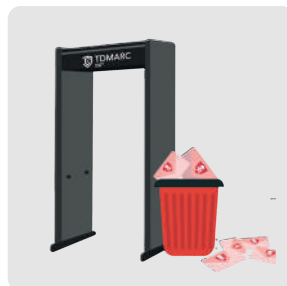

- Outbound threat email source monitoring
- Location wise threat emails volume
- Geolocating threat sources
- Threat Intelligence for source IP addresses
